

About Me

I am particularly keen on furthering my expertise in JavaScript, as I plan to specialize in this area. I have previously worked with HTML, CSS, and JavaScript to develop frontend components for websites of various local businesses as part of my side projects. Additionally, I have utilized Node.js with Express.js for backend development across several projects. Moreover, I possess foundational skills in deploying websites using AWS and Google Cloud platforms.

Education

Hlonipha Sec School

Grade 12

2019 - 2020

I carry an NSC matric certificate as a high school graduate.

Richfield GIT

Higher Certificate in Information Technology

2023 - 2024

Currently my highest level of education is a higher certificate in information technology. I do however plan on furthering my studies to a bachelors.
